

Spray product promises to aerate, dethatch soil

AKRON BEACON JOURNAL

LazyMan Liquid Gold promises to aerate and dethatch your soil without mechanical means and condition it at the same time.

The spray-on product loosens soil, allowing air, water and nutrients to enter

more easily. It also contains soil conditioners that help plants better absorb water and nutrients.

The product, available at www.outsidepride.com, costs \$34.99 a quart — enough to cover 10,000 square feet.
